

Immunogenicity of HIV- and HCV-derived minigenes in HLA transgenic animals.

Magnitude of CTL responses are shown as follows: + up to 2 LU (Lytic Units) or 10 SV (Secretory Units); ++ up to 200 LU or 100 SU; +++ up to 200 LU or 1000 SU; ++++more than 2009 LU or 1000 SU. Magnitude represents number of independent cultures yielding positive responses.

FIG.1

2/90

Synthetic polypeptides encoding HIV-derived HTL epitopes

\*junction peptides comprise either 10 amino acids from the N-terminal epitope and 5 amino acids from the C-terminal epitope or 5 amino acids from the N-terminal epitope and 10 amino acids from the C-terminal epitope.
